WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

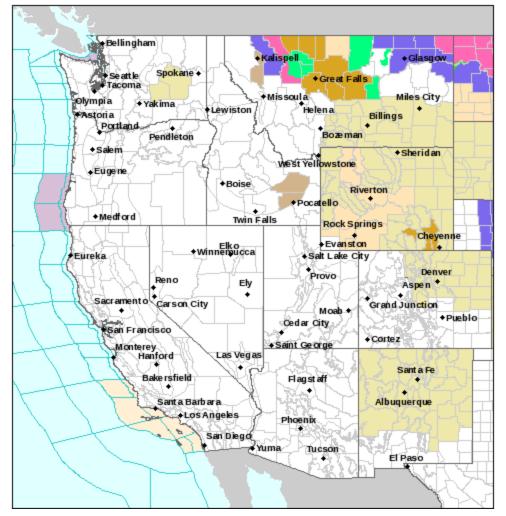

The high pressure ridge that has been offshore will move over the region today. Afternoon temperatures will be 15-20 degrees above normal and winds will be lighter than in recent days. Afternoon minimum RH readings will be 15-25% in most inland areas. A weak low pressure trough will move across the region this weekend. Temperatures will be a few degrees cooler, but still above normal, and humidity will be higher. There will be a few clouds, but no rain is expected. S-W winds will prevail, and gust to 20-30 mph over the higher terrain each afternoon. Another weak trough passing to our north will cause increasing clouds early in the week. There may be an isolated rain shower over the higher terrain. Winds will continue to be gusty at times out of the S-W and afternoon temperatures will be 5-10 degrees above normal. By Wednesday a slightly stronger system will move in and produce scattered showers, and confidence is increasing that a wave of moderate to locally heavy rain and high elevation snow will move in late next week and into the weekend.

SOUTHERN CALIFORNIA

A ridge of high pressure positioned over the Eastern Pacific will slide inland today, leading to warmer temperatures. Highs will climb into the 60s in the mountains and coastal areas, 80s in the valleys to 95 in the low desert. Some patchy dense fog will cover the immediate coastal areas. This weekend, the ridge will weaken which will allow some light onshore flow to bring a bit cooler temperatures. This, along with some high cloudiness, will lead to temperatures dropping 5-8 degrees Saturday and Sunday. Winds will remain light the next 3 days. During the first half of next week, expect little day-to-day change in the weather with highs averaging 5 degrees above normal with light winds. Long range models indicate a more active weather pattern may develop toward the end of next week into the weekend of April 8th. There will be a chance of rain over the northern half of the state by then with cooler, breezier weather expected elsewhere. No offshore wind events are expected throughout the period.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

2018-LAW-45912, 03/28/18, 1121 hours: Plumas County Sheriff's Office (PCSO) requesting two specific search and rescue (SAR) K9 teams to assist in searching for a missing 54 year old female last seen in the Chester area on 02/21/18. The requested resources are to meet for 0700 hours briefing this Saturday, 03/31/18, in Chester. Cal OES Law Enforcement Branch (LEB) coordinated the response.
 Mission Ongoing.

Cal OES MISSION TASKING

Cal OES Missions

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties.
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
